COMPREHENSIVE MS CARE

## WHY IS MIND THE RIGHT CHOICE FOR YOUR MULTIPLE SCLEROSIS CARE?

- Committed to improving our patients' outcomes and overall quality of life, MIND is one of a very limited number of private neurological facilities in the country recognized by the National Multiple Sclerosis Society as a Center for Comprehensive MS Care.

The MS Center at MIND was developed in 1999 by the late Dr. Howard and Sonda Rossman to provide the diagnostic, therapeutic, and supportive services to Multiple Sclerosis patients and their families and today cares for more than 2,500 individuals living with MS each year.

Our team of experts works to make care a one-stop shop, leveraging onsite, cutting-edge neuro-diagnostic technology, neuro-imaging, infusion services, medical education, and research. Patients are often able to complete all testing and evaluations in a single visit. MIND offers infusion centers in Farmington Hills and Roseville to better meet our patients needs.

MIND provides individualized care to help improve symptoms as well as assists with emotional and lifestyle needs.

WE  
OFFER:

- » Access to a wide array of approved MS therapies
- » Cutting edge neurodiagnostic technology
- » On site state-of-the-art MRI. Our wide bore MRI machines, a 1.5 Tesla and a 3.0 Tesla, accommodate larger patients or those uncomfortable or uneasy in smaller spaces
- » Multiple infusion center locations
- » Multiple sclerosis disease state education
- » Spasticity management
- » Rehabilitation services
- » Extensive clinical research experience and active participation in most MS clinical trials
- » Most insurance accepted
- » Advocacy for MS patients at the state and federal level
- » New AirRecon DL software allows shorter scan times with higher quality imaging.
