## Integrative Medicine for Optimal Health

*Maintaining a healthy body, mind and spirit is a journey – one that we support.*

The body has a natural ability to heal itself and maintain a healthy state of balance. Through the integration of conventional and integrative therapies, we believe in a patient-centered approach that encourages prevention and education, and promotes whole-body health and wellness.

Our team of experts provide complementary services to help patients achieve their goals.

Physicians often refer patients who may benefit from an integrative approach to treating their condition. The therapies we provide complement conventional medical care.

### Common Uses for Integrative Medicine:

- **Musculoskeletal:**  
Pain that effects the muscles, ligaments, tendons and bones
- **Women:**  
Infertility, peri-menopause and menopause, pregnancy, menstruation
- **Men:**  
Disease prevention, prostate, cardiovascular
- **Children:**  
Allergies, ADD, ADHD, infections, earaches, cold and flu, colic
- **Respiratory:**  
Allergies, asthma, sinus
- **Gastrointestinal:**  
Reflux, IBS, “sensitive stomach”
- **Neurological:**  
Headaches, MS, Bells Palsy, Neuropathy
- **Cancer Support and Risk Reduction**
- **Autoimmune, Metabolic and Inflammatory Disorders**
- **Depression and Anxiety**
- **Addictions, Insomnia and Fatigue**
